

COQUILLE PARKS & RECREATION NEWSLETTER

ADDRESSING TRAFFIC:

To the Coquille family:

We realize traffic is an issue. Your frustrations are understandable. Coquille staff and board members share in the frustration.

Last night and in future nights we will continue to have a detail to offset that problem the best we can.

Coquille is continuing to work with DOTD. At one time we were waiting for plans to be approved by DOTD; that is part of the process. Coquille wanted this project done a long time ago too. We have had to do several designs for this project due to Oak Trees and underground utilities; we also faced a pandemic in 2020 and a hurricane in 2021. The tax dollars you approved in 2018 will be used to build the access point on 1077 to Coquille Park.

As we stated in the letter we published last week on social media, the project is approved and currently out for bid. Next Tuesday, September 26, 2023, the project will be awarded and the construction to the second exit will begin in October 2023. Expected completion for this project is February 2024.

We are building this park for the continued growth of this community and to meet everyone's needs.

We are continuing to work with advisors on the traffic issues. We are hoping to fix this problem for our taxpayers soon because we agree it is time for a second exit from the park, and we look forward to that day coming very soon.

Sincerely,
Richard Bentley-Smith
Executive Director
